HONGKONG OFFICE: 14, DES VUEX ROAD CL.
LONDON OFFICE: 131, FLEET STREET, E.C.

HONGKONG, 25TH MARCH, 1904

THE Bill providing for the introduction of Chinese labour into the Transvaal has now become law, the House of Lords having rejected a motion to defer the introduction of Chinese until the Transvaal is granted representative government, and the Government having escaped a vote of censure in the Commons by 299 votes to 242. It may be taken, therefore, that there is no further obstacle, as far as Britain is concerned, in the way of Chinese immigration to the Rand. There is, of course, still the Chinese Government to be satisfied. At first it was stated that Peking was entirely against the scheme. It appears now, however, that this is not the case. The Chinese authorities are not opposed in toto to the proposed immigration of their countrymen into South Africa; but they require to be assured on certain points. What these are may be gathered from a Parliamentary paper published in London last month, containing among other documents the reply of CHANG TA-JEN, Chinese Minister in London, after receipt of a draft of the Labour Ordinance sent to him, with an enquiry whether the Ordinance was one upon which regulations acceptable to China could be framed. CHANG, after the caustic remark that, if a similar course had been taken by some of the self-governing Colonies which have passed laws offensive to the Chinese Government, much serious correspondence might have been avoided, wrote to the effect that he found nothing in the draft Ordinance likely to conflict with anything he would have to propose when negotiating with regard to the protection of Chinese immigrants under Article V. of the Treaty of Peking. He suggested, however, that the Chinese Consul or Consular agent

should have power to visit the mines and places of accommodation for the immigrants, and to make representations to the authorities concerning them; that no corporal punishment of the immigrants should be allowed; that the "importer" of the immigrants should be a bona-fide employer of labour, and that transfer of an immigrant should only be allowed with his consent and his Consul's approval; that repatriation should take place to the port of embarkation, not merely to country of origin, as provided in the Ordinance; and the immigration should be made only in British or Chinese ships and under British Board of Trade regulations for immigrant-ships. The Chinese Minister concludes his letter thus:—"The adoption of these suggestions by the 'authorities of the Transvaal' would much 'contribute to render the Ordinance more 'acceptable to the Imperial Government 'of China, and to the gaining of the confidence of intending emigrants; more 'especially in provinces whose inhabitants have not hitherto been in the 'habit of emigrating to foreign countries.' It is hard to dispute the reasonableness of the Chinese Minister's suggestions. The third, it should be noted, that with regard to the transfer of labourers, is stated by CHANG TA-JEN to be 'necessary in order to prevent the immigrant from being made a mere chattel or article of commerce.' It remains to be seen what attitude the Transvaal will take up toward China's proposals. The owners will be wise in accepting them, we think, if the introduction of Chinese labour is to become an accomplished fact. They will in acceding to China's requests do much to weaken the cry of the Opposition in the British House of Commons and in some of the constituencies about slavery. On the other hand, if they hold out for the most harassing restrictions on the immigrants, not only do they imperil the chance of the Chinese Government's approval, but they give point to outbursts like Sir WILLIAM HARCOURT's remarks about 'the greatest scheme of human dumping since the Middle Passage was abolished,' and furnish one more electioneering cry to distract home politics—a result which is not to the advantage of imperial politics, we need hardly say.

The French mail of the 23rd February was delivered in London on the 23rd inst.

The Earl of Donoughmore, who at one time was Private Secretary to Sir Henry Blake, is one of the civil members of the new Army Council.

A notice appears in the *Shanghai Times* to the effect that on the 12th March the paper became the property of Mr. Frank J. Maitland, and from that date *Sport and Gossip* was incorporated as the Sunday issue of the *Shanghai Times*.

A London telegram of the 7th inst. to the *Times of Ceylon* says:—*The Cingalee, or Sunny Ceylon*, is the final title selected for the Ceylon play at Daly's Theatre. The opening performance was an enormous success, Her Majesty Queen Alexandra being present.

At the meeting of the French Budget Committee, held on the 5th inst., M. Pollatant refuted the criticisms which were cast on him. He announced that he would reinforce the movable defence of Saigon and would send there two submarine-boats and four torpedo-boat destroyers.

News at the beginning of March from the Tibet Mission states that Lieut. Twiss, who was deputed to make a journey via Kham Valley, has returned, and reports that the villages along that route are decimated by small-pox. A large number of them were deserted. The hillside is dotted with grazing yaks. The path is good all through the Gochak Pass, 15,600 ft., and offers no difficulties. Game is plentiful. The inhabitants were friendly and helped Lieut. Twiss. There is a large number of hot springs near the top of the valley.

The Liverpool Chamber of Commerce have forwarded to Lord Avebury, for presentation to the House of Lords, a memorial on the subject of the metric system of weights and measures. The memorial recites the steps which have been taken in recent years to have the system adopted in this country by Chambers of Commerce and other kindred associations, and points out that in most of the countries of Europe and South America the metric system obtains. Reasons are given against further delaying the compulsory adoption of the system by this country, one of these being the great economy of time and money in respect of clerical services which would be effected by abolishing the large number of anomalies, customary or local but illegal weights and measures still largely used in various parts of the country. In conclusion, the memorial prays that the House of Lords will do their utmost to pass the Bill providing for the compulsory adoption of the system within a reasonable time, as recommended by the Select Committee of the House of Commons which reported on the subject in 1895.

Lieut. J. B. Clarke, 2nd Battalion Norfolk Regiment, till recently doing duty at the depot, has been specially appointed to the Chinese Regiment, and joins at Weihaiwei this month.

Some explanation is to be found in the recent mail papers of the occurrences mentioned by our Singapore correspondent lately when he reported the sighting by a vessel passing Palo Way at night of three warships using their searchlights. The Dutch Government has despatched three armed cruisers to guard Sabang Bay, Palo Way, off Sumatra. Although international law admits the theory that warships may obtain sufficient coal at a neutral port to enable them to reach the nearest home port, Holland is evidently resolved to avoid complications by a literal enforcement of her declaration of neutrality.

The *Saturday Review* writes:—"The report quoted from an English paper that Weihaiwei had been used by the Japanese as a naval base for their attacks on Port Arthur has spread and is believed all over Russia, caused questions in the House, induced Lord Lansdowne to cable out to Weihaiwei for information, and may continue for an indefinite time to aggravate Russian feeling. Compare the act with the agent. The whole origin was a small paragraph scribbled off under the pressure of the need of something to say in a column of naval notes by a journalist, wholly without any special information not supplied by his active brain, in the office of an evening paper of which it was recently said—in illustration of its responsible continuity—that the staff was challenged to a cricket match by a twenty-two of its ex-editors. It is easy to twist the Russians with inability to separate important and unimportant papers. Could we gauge all Russian papers?"

The *Japan Times* says:—"A murderer and robber, named Yonachichi Endo, aged 38, was executed lately at the Ichigaya prison. He would have passed away unnoticed had it not happened that his loyal heart awoke at the last moment to the grave situation of his country. On the day of the execution, Mr. Fujisawa, chief gaoler, told the convict that as it was the last day of his life, and as there still remained two yen odd of the money given him by his relatives, he had better purchase some delicacies and give himself a treat for the last time. The convict, quite unexpectedly, said in reply that he had learned from new prisoners that Japan was fighting with Russia. His only regret was that he could not help the country in the war in the manner he would have adopted if he were out of prison, and the only service he could render would be to contribute to the war funds the paltry sum remaining to his credit. He asked the chief gaoler to carry out his wishes, which the latter promised to do. The convict also offered his body for dissection to the medical college of the Imperial University. He then ascended the scaffold with heroic equanimity and self-composure.

The immediate cause of the failure of Messrs. William Watson & Co., the well-known army agents and bankers of London and Bombay, was the refusal of the Yokohama Specie Bank to discount any more of their bills. The Official Receiver at the first meeting of creditors held in London last month explained that these were simple accommodation bills, the discounting of which had kept the firm going. Probably the war was the immediate cause of the refusal of the bank to give further financial assistance, but it seemed deplorable to him that bankers who were entrusted with the money of their clients, should be living from day to day on money raised on accommodation bills. It was a matter for the strictest investigation. The total liabilities were roughly estimated at between £600,000 and £700,000, of which the London liabilities were £175,723. The assets of the London business were said to show a deficiency of only £1,882, but he was afraid that was purely imaginary; the liabilities would, no doubt, be largely increased. The assets in India and South Africa were considerable, and he had taken steps to protect them. Mr. C. E. Chapman, formerly Accountant-General for the Government of India, said that the debtors, in dealing with money drawn by them from the Treasury of India, for officers on furlough, had committed a serious breach of trust, and he was of opinion that it was a case for a criminal court. The debtors consented to an adjudication of bankruptcy, and a trustee was appointed with a committee of inspection.

By kind permission of Lt.-Col. Iremonger and officers, the Band of the 33rd Burma Infantry will play the following programme of music at the King Edward Hotel during dinner to-night (weather permitting):—

March, "Defiance" Ord Hume
"Hawthorn" Moret
Selection, "The Rose of Persia" Sullivan
Song, "The Honeyuckle and the Bee" Penn
Selection, "Songs without words" Mendelssohn
Waltz, "Whisper and I shall hear" Clothilde
Tarentelle, "The Original Napolitaine" Julien
"God Save the King."

The loss of the Liverpool and London and Globe Insurance Company (represented in Hongkong by Messrs. Wm. Meyerink & Co.) by the great fire at Baltimore, U.S.A. last month, was estimated at £200,000, exclusive of amounts eventually recoverable from reinsurers. On receiving cable advices, the Directors called the New York Office to draw for this loss if desirable at sight, and authorising a gift of \$10,000 gold (£2,000) for the relief of sufferers. The company's assets, according to the last balance sheet, amounted to nearly £11,000,000; the yearly income was shown to be £2,731,307, and total claims paid £41,331,183.

M. Camille Pollatant, French Minister of Marine, has received the following telegram from Vice-Admiral Avellan, Russian Minister of Marine, last month:—"S. Petersburg, Feb. 19.—Deeply affected by the news of the fraternal reception, the touching care, and the noble and chivalrous conduct of the whole crew of the French cruiser *Pascal* towards the Russian officers and sailors belonging to the ill-fated ships of the Imperial fleet, the *Varyag* and the *Korietz*, sunk in the harbour of Chemulpo on February 9. I beg you to be so good as to accept and transmit to the glorious navy of France our warm feelings of gratitude and admiration.—Th. Avellan, Vice-Admiral."

We take from the *Naval and Military Record* the following figures of the coaling of warships in Hongkong Harbour last January:—

| Ship. | Amount received. | Average per hour. | Greatest quantity received in one hour. |
|-------------------------|------------------|-------------------|---|
| <i>Leviathan</i> 2,200 | 314.2 | 450 | |
| <i>Amphitrite</i> 1,650 | 227.5 | 330 | |
| <i>Vengeance</i> 1,500 | 214.28 | 300 | |
| <i>Albatross</i> 1,500 | 208.3 | 280 | |
| <i>Orestes</i> 1,350 | 205.16 | 260 | |
| <i>Catapult</i> 730 | 104.2 | 190 | |

The Rear-Admiral signalled his appreciation of the results attained by the *Leviathan*, and congratulated the officers and men on their good work.

FOOTBALL.

H.K.F.C. V. THE NAVY.

The above match was played under Rugby rules, at Happy Valley yesterday afternoon. Sandford, captain of the Hongkong team, kicked off, and a pretty bit of combination was witnessed. Play continued in the Navy half for some time. A naval man getting away was tackled by Arthur. Jordan successfully checked another opponent, the ball being passed to Pearce, who kicked it well into touch. The Navy now gained some distance, bringing the ball along with their feet. Royle eventually running ahead with it. Royle was tackled by Black when the sailors were well up the field. The Navy again got away, Arthur, however, forcing them to send the ball into touch when a yard from the Clubline. Dixon made a good run, not being met for some distance. Arthur was tackled, getting a torn jersey. His withdrawal from the field to change suspended play. Gordon, of the Navy, got away next, passing to another player. Pearce, running at full speed, picked up wonderfully. At half-time the score was nil.

After the re-start Pearce got away, and passed to Black, the latter being collared. Hallifax broke away, and when tackled passed to Pearce, who sent the ball on to Jordan, the latter being tumbled. Dumbell next had a bit of a run, finally being shoved into touch. At last Pearce dropped a good goal with a long shot from some five yards outside the 25. This "bucked" the Navy up, and they swept the Club before them in a determined rush. Royle passed to Blackwood, who outpaced his adversaries and scored handsomely between the posts. Cameron was tackled by Royle, who, in turn, was collared by Black. Cameron again secured possession but, knocking the ball forward, a scrum ensued. When the ball was heeled out Centrall got nicely away, eventually passing to Blair who scored another try. It was not converted. No further points were made, the game ending in a win for the Navy by six points (two tries) to Hongkong's four (one dropped goal).

The teams were:—H.K.F.C.—Arthur, full back; Dixon, Pearce, Cameron, and Black, three-quarters; Jordan and Milman, halves; Sandford (Capt.), Hallifax, Rogers, Boyd, Dumbell, Storie, Rowley, and Chad, forwards. The Navy.—Centrall, full-back; Blair, Longmore, King, and Royle, three-quarters; Child and Blackwood, halves; Gordon, Rice, Willis, Reeves, Littleblade, Bissett, Davies, and Fornaby, forwards.

It was a very even game. Dumbell, in his wasp-coloured jersey, was everywhere, being exceptionally heavy—over 14 stone—for wheeling the scrums. Jordan, Royle, Black, and Pearce were greatly in evidence, and Gordon did steady work for the Navy.

A SAILING-SHIP AT HONGKONG.

One could almost count the sailing-ships that visit Hongkong during the year on the fingers, the more up-to-date steamers having almost wiped the pioneer type of craft off the trade in these parts. Indeed, almost the only "wind-jammers," to use a nautical expression, that come this way at all are occasional freighters from New York, with kerosene for the Standard Oil Company, or an odd lumber-vessel from elsewhere. The *Vale of Doon*, a small three-masted barque, flying the Sarawak flag, arrived from Rajang yesterday with 1,000 tons of timber, consigned to Messrs. Sander, Weller & Co. She was 35 days on the passage, experiencing strong N.E.—had winds—gales from latitude 17 to latitude 21. Mr. Wesemeyer is captain of the craft, while her owners are Messrs. Pasading & Co. of Amoy. It would be interesting, by the way, to know how many deep-water craft fly Rajah Brooke's flag.

TELEGRAMS.

"DAILY PRESS" SERVICE.

[FROM OUR OWN CORRESPONDENTS.]

THE WAR.

PORT ARTHUR—BOMBARDMENT ON TUESDAY.

LONDON, 23rd Mar., 11.5 a.m.

Viceroy Alexieff telegraphs to S. Petersburg stating that six Japanese battleships, twelve cruisers, and eight torpedo-boats bombarded Port Arthur for the space of two hours on Tuesday morning, the 22nd instant.

[It will be noted that this telegram absolutely disposes of the story of Port Arthur's capture on the 19th inst., and also that it shows that the Japanese battleship squadron is intact.—Ed. D.P.]

REVOLT IN THE CAMEROONS.

BRITISH TERRITORY ATTACKED.

LONDON, Mar. 24, 10.50 a.m.

A revolt has broken out in the Cameroons, a German colony in West Africa. It is reported that the rebels have crossed the border line and attacked British territory.

REUTER'S SERVICE.

THE WAR—PORT ARTHUR.

LONDON, 22nd March.

Reuter's Agency at S. Petersburg wires that it is unofficially stated that the Japanese reopened the bombardment of Port Arthur on the 22nd inst.

RUSSIA MAINTAINING DISCIPLINE.

LONDON, 22nd March.

General Kurapatkin has left Erskat, where 11 soldiers have recently been shot for pillaging and rape.

THE MEDITERRANEAN SQUADRON.

LONDON, 22nd March.

The Russian cruiser *Aurora* and three destroyers have arrived at Bizerta.

JAPANESE IN COREA.

LONDON, 22nd March.

An official Russian despatch, confirming that Japanese infantry and artillery occupied Anju and Pingyang, says that an increased movement of troops between these places is noticeable.

THE VOTE OF CENSURE.

LONDON, 22nd March.

Sir Henry Campbell-Bannerman's vote of censure was rejected by 239 to 242.

TRANSVAAL CHINESE LABOUR.

LONDON, 22nd March.

The House of Lords has rejected a motion to defer the introduction of Chinese until representative Government is granted to the Transvaal.

NAVAL NOTES.

H.M. river-grubst *Sandpiper* arrived from a cruise yesterday. The U.S. cruiser *New Orleans* is now on her way from Hongkong to join the U.S. Asiatic squadron. The U.S.S. flagship *Kentucky* is at the Kowloon Dock—it would be interesting to know when that now floating dock for Manila will be ready. H.M.S. *Glory* and the German gunboat *Moon* are still in the hands of the Dock Company.

The Indo-China s.s. *Kwongseang* arrived from Shanghai, via Swatow, yesterday, and included in her cargo were 64 cases of safety cartridges for the Naval Yard.

WEATHER REPORT.

The Hongkong Observatory yesterday issued the following report:—

On the 24th at 11.3 a.m. the barometer has risen in N. China and fallen at all other stations, particularly at those in SW. Japan. The depression referred to yesterday has moved in a SE. direction and is now approaching the coast of Kinsai.
Gradients are very slight on the China coast and over the China Sea. Light variable winds and foggy weather will prevail in the Formosa Channel, and light E. winds in the north part of the China Sea.
Forecast:—Light E. winds; overcast, misty.

WAR NOTES.

NORTHERN ITEMS.

L'Echo de Chine of the 17th inst. is advised from Port Arthur that "the *Retvizan* and *Pelada* have completed their repairs. The *Tsarevitch* will be ready in a few days. Everything is quiet in town. There is no deficiency in the supply of provisions and food."

It is stated that 250 mines were sent from Harbin to Newkiang on the 11th inst. They are intended for the Liao River, and will be laid as soon as the ice melts. The Russians brought twenty native boats to carry stones and mud to block the Liao River. The U.S. and British Consuls at Newchwang reported the matter to Peking to their respective Ministers, who sent a strong representation to the Russian Legation, and the scheme was eventually abandoned.

THE HARDINESS OF JAPANESE TROOPS.

There is much speculation as to how the Japanese troops will stand the almost Arctic weather in the field of operations. So far as the sailor element are concerned the following comment by an American officer who saw the Japanese at work at Weihaiwei during the Japan-China war will show that for endurance in cold weather the Japanese will compare favourably with the Russians. "They can live on cold uncooked food without consequent illness; they do not apparently suffer from either heat or cold. . . . They are brave to rashness, and they have no nerves; they can sleep anywhere at any time. . . . I inspected their torpedo-boat flotilla at the time of their capture of Weihaiwei. The weather was Arctic; it snowed three-quarters of the time, and it was blowing a gale, always with a heavy sea running. Half the time the crew did not turn in at all, but they were in the habit, as the blockade duty permitted, of hoisting 'the sleep signal' or which every division could be spared, when it would run into a small cove, drop anchor, and all hands would turn in, be it day or night. I used to see these men scrubbing hammocks in snow, clad in woollen sailor suits, without overcoats, and with straw sandals on their bare feet, while I was literally perishing with triple underclothes, two ulsters, and Arctic overboots. These men had been doing this kind of duty for months, and had been attached to their boats for nearly two years." We believe that a very large proportion of the soldiers will prove equal to the sailors in this respect. As many of our readers are doubtless aware, snow falls in abundance every winter in the North of Japan, but it may not be so well known that it has for years been part of the training of the troops stationed in the North of Japan to undertake route marches through the snow. Only a few years ago upwards of 200 soldiers lost their way in an exceptionally severe snowstorm and perished. The commencement of hostilities, however, is well-timed, and the movements of the troops are not likely to be hampered much longer by difficulties of this character.

STATISTICAL ERRORS.

A commentator on the war in one of the London papers points out certain statistical errors in what is generally written about the tonnage of the opposing fleets, and Japanese transport facilities. The Japanese, says this writer, have increased both exports and imports sixfold since the day, thirty years ago, when they became an naval pupils. This was satisfactory, since navies are founded on commerce, and with the commerce the shipping increased, as well, giving an efficient means of military transport by sea. The mistake of the critics is that they exaggerate the increase since the China-Japan War, owing to a very natural mistake. In 1895 the merchant shipping owned was in net register tons, whereas now the figures are given in gross tons. In addition, of late years the native-rigged craft of Japan have been included, whereas formerly they were excluded.

Another statistical error frequently made is the comparison of the size of Japanese and Russian ships. In the accounts of the critics the writers omit to mention that their figures are long tons (one ton equals 2,240lb.) in the case of the Japanese, and metric tons (2,204lb.) in the case of the Russians. Thus the *Tsarevitch* appears in the *Naval Annual* as 13,100 tons, but in British or Japanese measurement she would be 12,912 tons.

THE "YENISEI" DISASTER.

We have heard very little about the sinking of the torpedo transport *Yenisei* at Port Arthur last month. A graphic account is supplied by the statements of a survivor. The narrator, who was one of the crew, says:—"The torpedo transport *Yenisei*, while laying mines, was driven on to a mine by the wind and current. The mine exploded, tearing a large hole in the ship's bow. The captain, seeing that his ship must sink, ordered the crew to save themselves. The boats were lowered, and the crew then entreated the captain to leave the ship and save himself with them. This he positively refused to do. All this time it was apparent that everyone would be lost if the ship were not immediately abandoned. As the last man to be saved—a sentry who was guarding the ship's safe—sprang from his post into the sea, the captain was still on deck, and he went down with his ship. His last words were: 'Good-bye, my lads, save yourselves, and don't trouble about me.' A boat rescued the sentry, but the captain disappeared with the doomed vessel. Admiral Alexieff reported that the commander, three officers, and 92 men lost their lives in this terrible disaster."

The *Journal d'Agriculture Tropicales* seeks to answer the question, why coconut oil is not exported from the Philippines instead of copra, the raw material of the article. Custom and the interest of traders go against the export of oil, but the main hindrances arise from the heavy expenses attending the staking of oil mills, and the cost of transport in roadless districts. In other words, it is cheaper to export copra than oil.

HONGKONG SANITARY BOARD.

A meeting of the Sanitary Board was held on the 24th inst. in the Board Room. Hon. Dr. J. M. Atkinson (President) presided, and there were also present Hon. W. Chatham (Vice-President), Hon. A. W. Brown, Registrar-General, Mr. Lau Chi Pak, Mr. Fung Wa Chun, Colonel W. E. Webb, R.A.M.C.; Hon. H. E. Pollock, K.C.; Mr. E. A. Hewett; Mr. A. Ramjahn; Dr. W. W. Pearse, Medical Officer of Health; Dr. B. Barnett, Assistant Medical Officer of Health; Mr. G. A. Woodcock (Secretary) and Mr. T. A. Hammer (Assistant Secretary).

A MOTION.

The President, pursuant to notice, moved:—That the Board, under the provision of Section 30 of the Public Health and Buildings Ordinance, 1903, depote Inspector Thomas Ably to institute summary proceedings before a Magistrate against any person contravening any of the Bye-laws duly made under Section 16 of the Public Health and Buildings Ordinance, when so instructed in writing by one of the Medical Officers of Health. That the Board, under the provisions of Section 256 of the Public Health and Buildings Ordinance, 1903, depote Inspector Thomas Ably to institute summary proceedings before a Magistrate for the recovery of any penalty imposed by Part II. of the said Ordinance or any Bye-law made thereunder who is instructed in writing by one of the Medical Officers of Health.

The Vice-President seconded, and the motion was agreed to.

OPEN WORK CEILINGS.

Dr. Barnett, in a minute, suggested that open work ceilings under 122 of Ord. 1 of 1903 be not allowed in future. Lattice-work ceilings were not much better than closed ones, although they were better. The amount of dirt collected by an open-work ceiling was extraordinary, and they also often formed a harbour for rats.

Mr. E. A. Hewett minuted:—So far as I remember it, "ole custom" alone justifies a lattice ceiling.

Mr. A. Ramjahn minuted:—Quite right; I agree with the Assistant M. O. H.

Col. Webb, R.A.M.C., minuted:—Have rats ever been found in open-work ceilings?

Hon. Registrar-General minuted:—What is the use of a lattice-work ceiling?

Hon. D.P.W. minuted:—That is a matter within the direction of the B.A., but it will be useful to have the opinion of the Board on the subject. Some applicants plead strongly for ceilings to be allowed in their premises, and, in a few cases, I have allowed them on condition that they were of open construction—carved or lattice.

Dr. Barnett stated that he remembered a rat being caught in Queen's Road, about No. 150, in the same place at which this question of the ceilings had again cropped up. Even if rats were not found there they went there when pursued.

Mr. Lau Chi Pak held that lattice-work provided no hiding place for rats.

The Vice-President said that in superior Chinese houses the occupants objected to the somewhat unsightly appearance that the under side of the floor presented when these houses were built without ceilings. It was for that reason that he had granted them permission to erect these ceilings. He could not see that they could afford a very great harbour for rats. It lay between this form of ceiling and the ordinary form. He did not think it would be fair to these people to refuse them a ceiling altogether when they were allowed in European houses on the outskirts of the city.

Dr. Barnett mentioned that the ceilings in Beaconsfield Avenue had all been pulled down by order of the Board. Hon. Graham Stewart told him the other day that since then there had been no rats. The dirt that collected in this lattice-work was as great as that in any ordinary ceiling. The jointing was generally defective, and an enormous quantity of dirt came down between the boards and collected on the ceiling. Of this a great deal was organic matter, and it must be very unhealthy.

Dr. Barnett did not think there was much to choose between a lattice-work and a solid ceiling as a hiding-place for rats or for the collection of dust. Before any ceiling was allowed a special point should be made that the construction was such as to make it impossible for rats to make their way through hollow walls into the space between the ceiling and the joists.

The President moved that the Board recommend, from a sanitary point of view, that the ceilings be permitted as seldom as possible.

HOUSE DRAINS.

The Hon. W. Chatham, in a letter to the Sanitary Surveyor, asked whether, in the case of house drains, he was fixing intercepting traps in cases where they could be fixed, or not. If not, the ventilating pipe would act as a ventilator for the main sewer, which was in accordance with Mr. Chadwick's ideas on the subject.

Mr. J. Bryan, the Sanitary Surveyor, replied that in all cases the house drains were disconnected from the public sewers, and that the ventilating pipes, fixed to house drains, ventilated these drains only.

Hon. D.P.W. minuted:—It was Mr. Chadwick's intention that the intercepting traps should be omitted. Please see para. 76 and 77 of his report of 10-4-20. I thought this was being done.

The Sanitary Surveyor minuted:—I have received no instructions to this effect. Before such a system is adopted the recommendations contained in para. 82 to 84 should be enforced. The drainage bye-laws would require to be altered, I think, and probably an ordinance passed to make it permissible. Many owners, no doubt, would object to have the public sewers ventilated by

means of their private drains and ventilation pipes. I am of opinion that the omission of the discharges of water-closets, especially when the water-closet is situated inside the house, is likely to prove dangerous to the health of the occupants of that house.

The President said it might be possible to try this new method by doing away with these intercepting traps in a limited district of the town.

The Vice-President stated that the very reason that caused him to bring this up was that at the present time they had been reconstructing the gullies throughout the city, and as the gullies were now being trapped, whereas a large number of them were formerly left without traps, the means of ventilation had been very extensively reduced.

Mr. Ramjahn hoped they would do away with the intercepting traps in Robinson Road. He had experimented with these and found that they were breeding-places for mosquitoes.

The President added that there was the further objection that the ventilating pipes might be just underneath the windows of a house. The Board should insist on the use of non-porous materials for the drains.

The Vice-President moved that in future in constructing house drainage work intercepting traps be omitted.

Mr. Hewett said he was afraid that at that rate it would be 50 years before the work could be carried out.

The Vice-President having limited his motion to apply to only one drainage section of the city.

The President seconded the motion, and it was agreed to.

WATER-CLOSETS.

A report, concerning No. 1, Wyndham Street, was sent to the Sanitary Surveyor. It stated that in the basement of the house were a water-closet and several urinals. They were in a very bad state. A good deal of water seemed to run to waste. These urinals and closet had been put in for the old Hongkong Club. The premises were now occupied by Chinese, and the urinals and W.C. were kept in a filthy state.

Messrs. E. A. Hewett and A. Ramjahn, minuted, recommended their removal.

Dr. Pearce stated that a new restaurant was to be established where the old Hongkong Club was, and the proprietor had asked for the retention of these conveniences.

In these circumstances the discussion of the matter was postponed.

A recommendation was laid before the board to the effect that additional latrine accommodation should be provided for the Tai Ping Theatre. At present there were five seats. At intervals there would be probably 50 people living on the premises, and the theatre held about 2,500 persons. It was recommended that the Board should require an additional latrine of six seats.

The President moved the approval of the recommendation.

Mr. Hewett seconded, and the motion was agreed to.

A CONTRACTOR.

Young Yat, contractor, requested that his name be added to the list of authorised drainage contractors.

The application was granted.

THE GREEN ISLAND CEMENT CO.

The Green Island Cement Co. asked permission to build a wall on their premises at Kowloon. The wall would be well away from any building; 16ft. deep, 10ft. wide, built in granite, and the wall carried three feet above the ground. They desired the wall partly to tap a spring which gave them some trouble, and partly to increase their supply of water for manufacturing purposes, which supply ran rather low in the dry season. The wall would be entirely closed and the water only used for manufacturing purposes.

The President moved that the permission sought be given.

Colonel Webb seconded, and the motion was agreed to.

LIME-WASHING.

Mr. Lau Chi Pak minuted:—I should like to know if the people are still being prosecuted for not lime-washing their back-yards beyond the joists of the ground floor.

The President stated that according to the Board's decision instructions had been issued to lime-wash only up to the joists.

Mr. Lau Chi Pak said that people were complaining that the inspectors insisted upon the lime-washing of the back-yards.

Dr. Pearce:—That is a mistake then.

The President:—If you let us have the addresses we will make enquiries.

RABIES AT HANOI.

The President stated that in consequence of enquiries made a report had been received a few days ago that rabies existed at Hanoi, three cases having occurred within a month. He moved that the Government be recommended to make regulations prohibiting the landing of dogs from Hanoi for six months.

Hon. Mr. Pollock seconded, and the motion was agreed to.

WANCHAI MARKET.

A minute by the Registrar-General recommending the classification of the stalls in Wanchai Market was approved.

THE SECRETARY'S DEPARTURE.

Mr. Fung Wa Chun, at the conclusion of the formal business, said he wished to make a few remarks regarding the secretary of the Board (Mr. G. A. Woodcock) on the eve of his departure for England. Mr. Woodcock had served the Board conscientiously and satisfactorily for the past four years, and in spite of the fact that the work of his office had multiplied itself from year to year he had carried it through to the greatest satisfaction of the public. He was sure he simply echoed the feelings of the members when he wished Mr. Woodcock and his family bon voyage home and that they would return to the Colony in the best of health. (Applause.)

Mr. Woodcock:—Thank you.

The Board afterwards sat in private.

CHINA SUGAR REFINING CO., LD.

ANNUAL MEETING.

The annual meeting of the China Sugar Refining Co., Ltd., was held yesterday in the offices of the general agents, Messrs. Jardine, Matheson & Co. Hon. C. W. Dickinson presided, and there were also present Hon. Sir Paul Chater, C.M.G., Messrs. E. C. Wilcox, A. G. Wood and E. Shellim (consulting committee), Messrs. W. H. Gaskell, J. C. Peter, J. R. Michael, F. Smyth, A. Rodger, A. Bain, S. J. Michael, T. F. Forrest, G. H. Potts, Ho Fook, Lo Cheung Shin, and J. Barton (secretary).

The notice calling the meeting having been read,

The Chairman said:—Gentlemen,—I assume you will have no objection to taking the report as read. There is no special feature in connection with the working of the refineries during last year to which I could usefully refer. The difficulties attending our uncertain currency are, of course, still with us, but these I am sure you already fully appreciate. A higher level of exchange cheapened purchases of raw sugar and enabled us to secure greater margins on sales made in silver, the volume of which it will be of interest to you to know shows a very encouraging increase. Fluctuations in price were much less severe than we had been accustomed to for some time previously, and now that the pernicious system of bounties is a thing of the past, it is not unreasonable to suppose that when the still large stock of bounty fed sugars are worked off, speculation in the article will be determined by factors which can be more readily gauged. It has been deemed prudent to write down our stock and forward purchases of raw sugar to a point which should ensure the present year not being saddled with unduly high cost, a course which I feel sure will have your approval. While the inability for the second year in succession to pay any return to shareholders is matter of regret to the general agents, yet you will doubtless regard the result of working for 1903 as not unsatisfactory, the profit made representing as it does 144 per cent on the capital of the company. There is still unfortunately a rather considerable sum at debit of profit and loss, which must be covered before we again reach a dividend paying stage, but if present prospects hold, there is good ground for hoping that this will be achieved before another year's accounts are submitted to you. I beg formally to move that the report and accounts as presented be adopted and passed.

Mr. G. H. Potts seconded, and the motion was agreed to.

Mr. J. C. Peter moved that the consulting committee be re-elected.

Mr. W. H. Gaskell seconded, and the motion was agreed to.

Mrs. F. Smyth moved that Messrs. T. Arnold and W. H. Potts be re-elected auditors.

Mr. J. R. Michael seconded, and the motion was agreed to.

This was all the business.

LUZON SUGAR REFINING CO., LD.

ANNUAL MEETING.

The annual meeting of the Luzon Sugar Refining Co., Ltd., was held yesterday in the offices of the general agents, Messrs. Jardine, Matheson & Co. Hon. C. W. Dickinson presided, and there were also present Messrs. J. H. Lewis and A. G. Wood (consulting committee), P. A. Barlow, G. H. Potts, E. J. Moses, W. J. Gresson, C. R. Ross, Ho Fook, J. M. Grace and J. Barton (secretary).

The notice calling the meeting having been read,

The Chairman said:—Gentlemen,—As indicated in the report now before you, there has been no work done at the refinery during last year, circumstances with which you are already conversant continuing to render this impossible, and the accounts now submitted show only an increased debit balance by the addition of fire insurance, interest and such minimum expenditure as was necessary to keep the machinery and buildings in a satisfactory condition. The outlook, I regret to say, is no more promising than it was a year ago. It is difficult, under prevailing circumstances, to shape any other course than that being pursued, although it is obvious that this cannot go on indefinitely; but I may say that if any reasonable offer for the property were received, I should not hesitate to at once put it before you for your favourable consideration. I beg to formally move the adoption of the report and accounts as presented.

Mr. Barlow seconded, and the motion was carried.

Mr. G. H. Potts moved the re-election of the consulting committee.

Mr. E. J. Moses seconded, and the motion was agreed to.

Mr. C. H. Ross moved the re-election of the auditor, Mr. T. Arnold.

Mr. J. C. Peter seconded, and the motion was agreed to.

This was all the business.

YANGTZE WHARF & GODOWN CO., LD.

The following is the report of the directors for the year ended December 31st, 1903, to be submitted to the ordinary annual meeting to be held at the office of the general agents, Shanghai, on the 30th March.

Out of the balance at credit of profit and loss, viz.: Tels. 49,760.10, it is proposed to pay a dividend of 18 per cent, absorbing Tels. 45,000, and to place Tels. 3,000 to the credit of repairs account, carrying forward Tels. 1,070.10 to next year.

Mr. Witt having left Shanghai, Inspector Kohler, of the Hamburg-America Line, had been invited to take his place on the Board, and his appointment requires confirmation. According to the articles of association, Mr. E. Lamke and Mr. B. Kohler retire from the Board, but being eligible offer themselves for re-election.

The property of the company has been kept in good repair, and the cost charged to working expenses without drawing on repairs account. The accounts have been audited by Mr. G. Willeumier, who offers himself for re-election.

WATKINS, LIMITED.

The following is the report of the general managers, to be presented at the ordinary annual meeting of shareholders, to be held at the Company's office at noon, on the 26th March:—

Gentlemen,—We beg to submit to you our report, and a statement of the accounts of the Company for the year ended the 31st December, 1903.

PROFIT AND LOSS ACCOUNT.

After providing for all bad and doubtful debts, and including the \$1,053.10 carried forward from last year, the balance at credit of this account amounts to \$15,442.22. From which has to be deducted the following sums written off as depreciation, viz.:—

From plant and machines, 32,000.00

From furniture and fixtures, 1,700.00

From steam launch, 700.00

4,400.00

Leaving available the sum of \$11,042.22

DIVIDEND.

From the above amount your general managers propose to pay the same dividend as last year, namely, 10 per cent, absorbing \$10,000, and to carry forward the balance of \$1,042.22 to the current year's account.

EQUALISATION OF DIVIDEND FUND.

The amount at credit of this fund remains as before, \$4,802.57.

AUDITOR.

The accounts have again been audited by Mr. W. Hutton Potts.

BALANCE-SHEET, 31st December, 1903.

Capital—10,000 shares @ \$10 fully paid-up 100,000.00

Equalisation of dividend fund, 4,802.57

Dividends unclaimed at date, 4,822.37

Guaranty Trust Company of New York, 11,947.19

Bills payable, 27,311.21

Loans payable, 6,160.00

Accounts payable, 15,129.85

Loan on mortgage, 22,720.00

Profit and loss account, 11,042.22

\$200,564.64

ASSETS.

Aerated water plant, as per last report, \$ 9,000.00

Less written off, 2,600.00

7,400.00

Steam launch, as per last report, 7,000.00

Less written off, 700.00

6,300.00

Furniture and fixtures, as per last report, 1,700.00

New shop fixtures, &c., since added, 15,377.18

Less written off, 1,700.00

15,377.18

Building, 22,720.00

Fixed deposits, 2,240.00

National Bank of China, Limited, 311.60

Hongkong & Shanghai Banking Corporation, 524.42

Cash, 1,570.49

Liabilities attaching to 1904, 736.67

Stock, &c., with branches, 14,132.44

Stock on hand, 20,310.14

39,217.70

\$200,564.64

PROFIT AND LOSS ACCOUNT.

To amounts written off for depreciation:—

From aerated water plant, \$2,600.00

From steam launch, 700.00

From furniture and fixtures, 1,700.00

4,400.00

To balance, 11,042.22

\$15,442.22

By balance forward from last year, 10,000.00

By net profit for the year 1903, less bad and doubtful debts written off, 14,389.12

\$15,442.22

CAMPBELL, MOORE, AND CO., LD.

The following is the report of the board of directors to the eighteenth ordinary meeting of shareholders, to be held at the Company's office, No. 29, Queen's Road Central, on the 31st March, at noon:—

Gentlemen,—The directors have the pleasure to lay before you the accounts for the twelve months ending 31st December, 1903, showing a credit balance of \$6,923.51, which, with your approval, your directors propose to deal with as follows:—

To pay a dividend of 30 per cent, \$3,600.00

To pay directors' fees, 600.00

To write off fixture and furniture accounts, 126.58

To place to reserve fund account, 2,000.00

To carry forward to next year's account, 596.93

\$6,923.51

The business continues steady and there is every probability that a similar result may be looked forward.

The accounts have been audited by Mr. A. O'D. Gourdin, who offers himself for re-election.

A. F. ARCUCCI, Chairman.

Hongkong, 24th March, 1904.

BALANCE-SHEET.

From 1st January to 31st December, 1903.

To stock—Value of stock on hand, 10,004.18

To accounts receivable—Due from customers, 5,271.08

To cash—Amount on hand, 119.43

To Chartered Bank—In current account, 3,926.14

To fixed deposit account—With Chartered Bank of India, Australia and China, 3,500.00

To furniture and fixtures, 578.45

Written off as per resolution passed 31st March, 1903, 178.45

Less sale of an iron safe, 10.50

Since added, 489.50

To insurance account—Unexpired fire premium paid in advance, 18.49

\$23,525.88

LIABILITIES.

By capital—1,200 shares paid up at \$10 each, 12,000.00

By accounts payable—Due to sundry creditors, 897.57

climate. Beautifully bright, seductively sparkling
and perfectly pure.
F. BLACKHEAD & CO.,
Sole Agents.
Hongkong, 25th July 1903. [5]

BUDWEISER BEER

In a late experiment in Switzerland, a Scotch
boiler was found to be 159 degrees C. hotter at the
upper part than at the lower part, and the
temperatures changed but slightly after two
hours. As this peculiarity is a chief objection to
this form of generator, a test of other boilers is
desired.

The saltiness of the Dead Sea is attributed by
Mr. W. Alkroyd in considerable degree to air-
borne salt from the Mediterranean.

A new application of the Röntgen rays has
been discovered by M. Raphael Dubois, Pro-
fessor of Physiology at Lyons. In the pearl
fishery an enormous destruction of oysters and
"independent" pearls annually takes place. To
ascertain the size of the pearl it has been
necessary hitherto to force open the shell. The
death of the oyster naturally follows, and as the
"pearl" is frequently too minute to be of
commercial value, both the oyster and the
growing pearl are lost. Now, however, by the
help of the rays, it will be possible to ascertain
the size of the pearl without opening, and so
killing, the oyster, and should the "precious
stone" be so small as to be worthless the oyster
will be replaced in his natural element to grow
both himself and his treasure.

SCIENTIFIC MISCELLANY.

THE NEW SCIENCE—WHEN DOGS GO MAD—
PROPERTY A PREVENTIVE OF CONSUMP-
TION—DURABLE MIRRORS—ELECTRICITY AS
A LIFE-SAVER—ALCOHOL AND DEVELOP-
MENT—ARSENIC IN FOOD—UNEQUAL HEAT-
ING OF BOILERS—X RAYS & PEARLS.

Discovered seven years ago, radio-activity is
now declared by Dr. Frederick Soddy to have
reached the stage of an independent science,
quite distinct from chemistry and physics.
Explaining the property, Prof. Rutherford and
this author regard the radio-elements as slowly
disintegrating, the change being marked by the
expulsion of rays, and the disintegration
proceeding by leaps through several stages.
The energy given out, enormous compared with
that involved in any previously known change,
is derived from the store of internal energy of
the changing atom. This view is looked upon
as a safe working hypothesis, and it does not in
any way upset the atomic theory of chemistry.

A common notion concerning rabies is that
it is most prevalent in "dog days." Dr.
Dawbarn cites statistics of the U.S. Department
of Agriculture as showing that 14,068 cases
were thus distributed by months: January,
943; February, 1045; March, 960; April, 1323;
May, 1419; June, 1467; July, 1435; August,
1294; September, 1145; October, 965; Novem-
ber, 893; December, 1137.

An English medical man points out that in
the last ten years consumption has increased
in countries where economic conditions have
become worse, as in Ireland; but decreased where
the conditions have improved. Not only must
infection be destroyed, but it is to be remembered
that environment, light, pure air, good food,
contentment, and happiness are potent pre-
ventive agents.

A British naturalist suggests that the de-
struction of animal life by heavy rains has
received too little attention. The mortality
among insects and all animals is certainly very
great.

Silver gives the best known reflecting sur-
face, but mirrors made from it soon tarnish near
the electric arc—probably through the action of
ozone. A metal that can be safely exposed to
such action is the rare and expensive palladium,
which has nearly the same whiteness as silver.
In a recently-described German process, concave
mirrors are made by giving a convex glass
mould a thin coating of silver, then a thicker
one of copper, after which the metal is separated
from the glass by heating, and the silver surface
is given a thin film of palladium by an electro-
lytic method. This light-reflecting surface is
unsurpassed and is not liable to become dim.

Reduction by electricity of an aneurism or
dilatation of the aorta, the main artery of the
body, has been attempted in nine recorded cases,
but only three patients survived. In a recent
successful attempt, the galvanic current was
applied to a Philadelphia man for one hour,
reducing an aneurism that extended 3 inches
above the base of the breast bone and was
3 1/2 inches wide. Dr. James Brion, of Essex,
Ont., has saved a child's life by electricity,
the infant being born apparently dead, and the
current being applied after 15 minutes.
In 15 minutes more signs of returning life appear-
ed, pulsation of the heart and breathing being
normal 10 minutes later.

Considering the possible influence of alcohol
upon human evolution, Dr. Harry Campbell
assumes that such civilisations as those of
Babylon and Egypt may date back 30,000 years,
and that agriculture by migratory tribes may
extend back 30,000 years more, but concludes
that the use of alcohol as a beverage has not
been known more than 10,000 years. He finds
no reason to believe that, as was suggested some
years ago, the discovery of fermented liquors
gave the first civilising quickening to the brain
of apes-man.

Leather railway-ties are made by grinding
scrap leather very fine, subjecting to a roasting
process, and compressing to different grades of
hardness in a moulding machine.

The smokeless boiler of Sir John Primrose,
of Glasgow, is claimed to be revolutionary in
several ways. It depends upon a separate
water-jacketed chamber, in which combustion
takes place, and only the gaseous products of
combustion impinge on the fire or water-tube
steam-raising surfaces. The air and fuel are
fed together, no unconsumed gases escaping
from the furnace, while no smoke or carbonic
acid comes from the chimney or funnel. Great
economy in fuel and efficiency in steam are
effected, and experiments on a marine boiler
indicate that the new system will give a ship its
present power with half the present boiler-room
space and boiler-room weight.

The beer-poisoning epidemic of Manchester
has been the subject of a prolonged
Government investigation. A final report shows
that there were 6,000 cases of poisoning, with
more than 100 known deaths, and that the
arsenic was introduced into the beer by sugar
or glucose that had been contaminated by the
sulphuric acid used in its manufacture. Poison-
ing in other localities has been traced to the
contamination of malt by the use of arsenical
fumigants. Various foods are liable to
gas-escape in drying. Various foods are liable
to contain arsenic, including golden syrup and
treacle, substances containing glucose, various
extracts of malt, prepared and infant foods, and
yeast cakes.

In a late experiment in Switzerland, a Scotch
boiler was found to be 159 degrees C. hotter at the
upper part than at the lower part, and the
temperatures changed but slightly after two
hours. As this peculiarity is a chief objection to
this form of generator, a test of other boilers is
desired.

The saltiness of the Dead Sea is attributed by
Mr. W. Alkroyd in considerable degree to air-
borne salt from the Mediterranean.

A new application of the Röntgen rays has
been discovered by M. Raphael Dubois, Pro-
fessor of Physiology at Lyons. In the pearl
fishery an enormous destruction of oysters and
"independent" pearls annually takes place. To
ascertain the size of the pearl it has been
necessary hitherto to force open the shell. The
death of the oyster naturally follows, and as the
"pearl" is frequently too minute to be of
commercial value, both the oyster and the
growing pearl are lost. Now, however, by the
help of the rays, it will be possible to ascertain
the size of the pearl without opening, and so
killing, the oyster, and should the "precious
stone" be so small as to be worthless the oyster
will be replaced in his natural element to grow
both himself and his treasure.

NO DINNER IS COMPLETE
Relish for food and power to digest are essential to sound health. When digestion fails, as in dyspepsia, both body and brain are starved and the patient becomes languid and weak, incapable of active, vigorous effort, or clear, sustained thought. Thirty drops of Mother Seigel's Syrup, taken daily after meals, makes food nourish you. As a digestive tonic it has no equal.

WITHOUT SEIGEL'S SYRUP

"It is with great pleasure that I testify to the wonderful value of Mother Seigel's Syrup for Indigestion. Having tried several remedies without avail, I resolved to try Mother Seigel's Syrup. The first dose had a marvellous effect, and in a very short time the indigestion left me. I strongly recommend it to all. W. C. City, 25, Barlow Buildings, Parliament Street, Port Elizabeth."

THE WORLD'S ANTIDOTE FOR INDIGESTION.

JAPAN COALS.

Godown Company, Limited, Kowloon, whence
delivery may be obtained.

Optional Cargo will be forwarded unless
notice to the contrary be given before 11 A.M.
To-day, the 15th inst.

No Claims will be admitted after the Goods
have left the Godowns, and all Goods remaining
undelivered after the 25th March, will be subject
to rent.

All broken, chafed, and damaged Goods are
to be left in the Godowns, where they will be
examined on Friday, the 25th March, at
9.30 A.M.

All Claims must reach us before Wednesday,
the 30th March, or they will not be recognised.
No Fire Insurance will be effected.
Bills of Lading will be countersigned by the
undersigned.

MELCHERS & CO.,
Agents.**

Hongkong, 19th March, 1904. [5]
**OCEAN STEAMSHIP COMPANY,
LIMITED,
AND
CHINA MUTUAL STEAM NAVI-
GATION COMPANY, LIMITED.**

CONSIGNEES per Company's Steamer

"NINGCHOW,"
are hereby notified that the Cargo is being
discharged into Craft, and/or landed at the
Godowns of the Hongkong and Kowloon
Wharf and Godown Co., Ltd., where in both
cases it will be at Consignees' risk. The Cargo
will be ready for delivery from Craft or Godown
on and after the 23rd inst.

Optional Cargo will be landed, unless notice
has been given prior to steamer's arrival.
All broken, chafed, and damaged Goods are
to be left in the Godowns, where they will be
examined at 11 A.M., on the 25th inst.

No Claims will be admitted after the Goods
have left the steamer's Godown, and all Goods
remaining undelivered after the 25th inst.,
will be subject to rent.

All Claims against the Steamer must be
presented to the Undersigned on or before the
31st inst., or they will not be recognised.
No Fire Insurance has been effected.

NOTICE.

CONSIGNEES of Cargo from London ex.s.s.
Memphis and *Cristine*, from Havre ex.s.s.
Memphis from Bordeaux ex.s.s. *Ville de Bordeaux*,
in connection with above Steamer, are hereby
informed that their Goods, with the exception
of Opium, Treasure and Valuables, are being
landed and stored at their risk into the
Godowns of the Hongkong and Kowloon Wharf
and Godown Co., Ltd., at Kowloon, whence
delivery may be obtained immediately after
landing.

Optional Cargo will be forwarded on unless
intimation is received from the Consignees
before 10 A.M., To-day, 2nd inst., requesting
it to be landed here.

Bills of Lading will be countersigned by the
Undersigned. Goods remaining undelivered after
Tuesday, the 29th March, at Noon, will be
subject to rent and landing charges.

All claims must be sent in to me on or before
the 29th March, or they will not be recognised.
All damaged packages will be examined on
Tuesday, the 29th March, at 3 P.M.
No Fire Insurance has been effected.

THE DIRECTORY AND CHRONICLE

FOR
CHINA, JAPAN, COREA, INDO-CHINA
SIAM, STRAITS SETTLEMENTS,
MALAY STATES, NETHER-
LANDS INDIA, PHILIP-
PINES, BORNEO, KOREA,
WITH WHICH ARE INCORPORATED
THE CHINA DIRECTORY
AND
THE HONGKONG DIRECTORY
AND HONG LIST FOR THE FAR EAST
FOR
1904.
THE FORTY-SECOND ANNUAL ISSUE.

The DIRECTORY covers the whole of the
ports and cities of the Far East, from Nether-
lands India to Siberia, in which Europeans reside.
Not only is the Directory as full and complete
in each case as it can be made, but each Colony,
Port, or Settlement is prefaced by a DESCRIPTION,
carefully revised each year, most of
which will serve as accurate GUIDES FOR THE
TOURIST, giving every detail in connection with
the place, Local History, Topography, &c., &c.

The Information in these Descriptions, con-
sisting of a hundred interesting articles, packed
with facts closely set out, and containing
statistics of the Trade of each Country and
Port, would alone suffice to fill a large volume.
The Directories and Descriptions are of
CHINA

The Book is printed from New Type specially
reserved for the purpose, and uniformity in every
arrangement now greatly facilitates reference.

The ALPHABETICAL LIST OF RESIDENTS
contains the names of over
20,000 FOREIGNERS,
carefully arranged, with the Initials as well as
the Surnames in strictly Alphabetical Order, so
that any name can be found instantly.

The PROTESTANT MISSIONARIES
IN CHINA, JAPAN AND COREA are
arranged in a special separate list.

THE MAPS AND PLANS
have been engraved by one of the most eminent
Firms in Great Britain and are correct and
brought up to date. They consist this year of
fourteen of the following—
COLORED PLATE OF FLAG OF FOREIGN HONGS
MAP OF THE FAR EAST
PLAN OF YOKOHAMA
PLAN OF KOBE AND HYOGO
PLAN OF FOREIGN SETTLEMENTS, TIENTSIN
PLAN OF TIENTSIN (KIAOCHAU)
NEW PLAN OF DALNY
PLAN OF FOREIGN CONCESSION, SHANGHAI
PLAN OF HONGKONG (SHANGHAI) with Inset
Showing the EXTENDED SETTLEMENT
LARGE PLAN OF THE CITY OF VICTORIA
PLAN OF PEAK DISTRICT, VICTORIA
PLAN OF KOWLOON
NEW PLAN OF MANILA
PLAN OF SINGAPORE
PLAN OF PENANG
PLAN OF BATAVIA

The CHRONICLE covers the notable events
of the last half century in the Far East together
with the Ports of all the most important Treaties
concluded with the countries of Eastern Asia,
the various Customs Tariffs, Trade Regulations,
Charters of Commerce, Scales of Commissions,
Consular and Court Fees, Hongkong Stamp
Duties, Postal Guide, Signal Codes, Chinese
Festivals, Tables of Money Weights, and
Measures, and other Commercial Information

lations for Japan, &c.

The CHRONICLE and DIRECTORY, a
though printed in smaller type than formerly,
and condensed in every possible manner, con-
tains every year more pages.
Royal Octavo—Complete with Fourteen Maps
and Plans, pp. 1,750, \$10.00. Directory only
pp. 1,300, \$6.00.

It was years ago universally pronounced to be
the cheapest work of the kind anywhere
published, and although very much enlarged
and improved in every way, the price in silver
is now greatly below the equivalent of £1 5s.
at which it was originally published.

It is published at the Office of the *Hongkong
Daily Press*, and can be had from, and Adver-
tisements sent through—

"Sanitas"
Purifying Agent
Indispensable in Hot Countries.
"Sanitas" Disinfecting Fluid
is non-poisonous and non-staining, and for
general or personal use is thoroughly effective.
It completely disinfects the house in which
it is used, and administered internally prevents
Cholera, Typhoid fever, Dysentery, etc.
"Sanitas" Disinfecting Powder
is the best air purifier known, and a stronger
antiseptic and deodorant than carbolic acid;
besides being pleasant and refreshing.
"Sanitas" Eucalyptus Soap
is specially recommended by the medical
faculty for use in hot climates, because of its
fine disinfecting qualities and its fragrance.
Kingzett's Fumigating Candles
supply the safest and most convenient means
of thorough fumigation. For the disinfection
of infected places, bedding, clothing, etc.,
they are both efficacious and economical.
Destroy all insects.
